

SOUTHPORT L.L.C.

Housing the offshore oil and gas industry is the focus of Southport. From quarter's buildings of all sizes to electrical buildings, control centers, and helidecks, this division of Gulf Island Fabrication specializes in construction, maintenance, and repair of liftable buildings for a variety of clients. The company provides its technical expertise and services for offshore, inshore and onshore sites throughout the country and the world. Experience and flexibility make Southport a trusted leader in its field.

Oil and gas producers like Chevron Texaco, Kerr McGee, Exxon Mobil, Conoco Phillips, Shell and numerous others have relied on the skilled staff of Southport to supply products and services key to early production dates.

Southport maintains a quality management system that is certified to ISO 9002-2000 standards.

The entire Southport organization prides itself in adhering to production schedules and meeting deadlines. Because of the versatility of Southport's workforce, the company can react quickly and efficiently to changing project requirements or emergency needs of the customer.

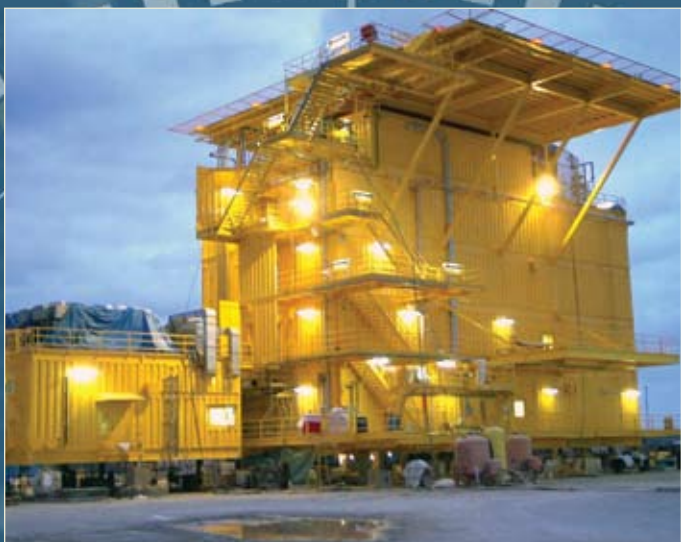

Above all, Southport takes pride in having a top-quality, behavior-based safety program that protects our most valuable asset — our people.

To serve the needs of our customers, Southport is located in a modern 22-acre facility along the Houma Navigational Canal. This facility provides waterfront construction space for 6 to 10 major buildings depending on size, and numerous areas for the construction of smaller buildings. Easy access to the Gulf of Mexico and proximity to the Gulf Island Fabrication facilities for resource sharing are principal advantages.
