

*Heavy-lift capacity allows for easy tank loading.*

Putting Our Experience to Work for the Offshore, Marine and Heavy Construction Industries

# Pressure Vessel and Tank Barge Fabrication

Since 1985, Gulf Island Fabrication, Inc. has grown to become a worldwide leader in the construction of specialized structures and vessels used in the oil and gas industry. Today, the company is pleased to put this experience and its commitment to quality craftsmanship to work in the marine transportation industry with the fabrication of large-diameter pressure vessels and tank barges at two of our subsidiary facilities.

Gulf Marine Fabricators (GMF), located in Aransas Pass, Texas, specializes in the construction of offshore platforms, providing heavy steel fabrication expertise that makes the subsidiary uniquely suited for the fabrication, assembly and loadout of large-diameter pressure vessels.

**Features of the GMF 372-acre facilities include:**

- 20' diameter rolling capacity
- Large diameter tubular assembly line
- Heavy-lift capacity
- Stress-relieving capabilities
- ISO 9001-2000 certified
- ASME certified, U & R stamps
- 6 Hydraulic Transporters and 12 Crawler Cranes

*Large diameter tubular assembly line*

Vessels can be loaded onto owner-furnished barges, or clients can take advantage of Gulf Island Fabrication's effective turnkey package. Subsidiary Gulf Island Marine Fabricators, located in Houma, Louisiana, along the Houma Navigation Canal, offers tank barge construction as a value-added service to our pressure vessel clients.

**Gulf Island Marine Fabricators' 437-acre facility features:**

- Advanced automated technology, including a new automated panel line that allows for material cutting, blasting and painting, and single-sided panel welding
- 9,000-ton-capacity dry dock with 140 feet between wing walls
- ISO 9001-2000 certified
- 6 Hydraulic Transporters and 16 Crawler Cranes
